SUMMARY

Full Stack Developer with 3 years of experience in building and scaling innovative web applications using ReactJS, NodeJS, MongoDB, and AWS. Skilled in optimizing system performance (reducing MongoDB query time by 40%), integrating Generative AI, and deploying scalable solutions on AWS.

PROFESSIONAL EXPERIENCE

Software Developer Engineer   Jul 2023 – Present
Recht Tech Pvt. Ltd., Gurgaon, India
- Worked on 5+ diverse projects, including CRM systems, legal information systems, assessment platforms, and the company website, utilizing the MERN stack to achieve efficient and scalable solutions.
- Improved UI/UX and optimized MongoDB queries, boosting user engagement by 20% and reducing response time by 40%.

Full Stack Web Developer   Jul 2022 – Jun 2023
Masai School, Bengaluru, India
- Completed MERN stack course and developed full-stack applications following Agile methodologies.
- Completed Generative AI course, using AI tools to streamline the learning process and enhance work efficiency, reducing research time by 30% and generating more effective prompts that improved project outcomes by 20%
- Completed over 900 DSA challenges to strengthen algorithmic skills and coding efficiency..

PROJECTS

Note: According to the nondisclosure agreement (NDA) in place, live URLs for Recht Tech portals cannot be shared publicly.

RecQARZ – Debt Recovery Platform
- Enabled multi-language notices via Email, SMS, and WhatsApp for clients like SBI Card, TVS Credit, and HDFC Bank, improving communication efficiency by 40% and reducing customer query response time by 25%
- Created a system for bulk data insertion and integrated data visualization tools, increasing data processing speed by 50% and providing enhanced user insights that contributed to a 15% increase in customer retention
- Collaborated with legal teams to customize the platform for client-specific needs.
- Used React, Redux, Node.js, Express, MongoDB, and ChartJS, along with AWS deployment, to ensure scalability and high performance.

ODR – Online Dispute Resolution Platform
- Build a secure platform with video conferencing, document sharing, and real-time chat. Automated case tracking and status updates for improved case management.
- Implemented with React, Node.js, Express, MongoDB, AWS for enhanced security.

Assessment Platform for Law Students
- Created a platform for assessing legal knowledge, automating result tracking and feedback to increase efficiency.
- Leveraged with React, Node.js, Express, MongoDB, and AWS.

TECHNICAL SKILLS

Languages / Databases: JavaScript, TypeScript, HTML5, CSS3, MongoDB, Mongoose

Frameworks / Libraries: React.js, Redux, Node.js, Express.js, Chakra UI, Material-UI, Ant Design (antd), Tailwind CSS, Highcharts, ChartJS, Jest

Developer Tools: Git, GitLab, Jira, AWS, Nginx, ProofHub, Postman, VS Code, NPM

Soft Skills: Teamwork, Active listening, Ownership

EDUCATION

Bachelor of Engineering   Jul 2015 – May 2019
IPS College of Technology & Management (8.02 CGPA)   *Gwalior, M.P.*
