EXPERIENCE

Full Stack Developer (Remote)

Sep 2025 – May 2026

Gulf Mirror Media Group LLC.

Dubai, UAE

- Working as a Full Stack Developer on multiple media and content-driven platforms including **TheWonderMom**, **HarvestHub**, **GulfMirrorNews**, and **WonderMom Directory**.
- Developing scalable frontend interfaces using Next.js and modern UI libraries like tailwind and shadcn while integrating REST APIs with Node.js and MongoDB.
- Collaborating with distributed teams to deliver SEO-optimized, performance-focused applications for global audiences.

Software Developer (Frontend)

Nov 2024 Aug 2025

Staqu Technologies Pvt. Ltd.

Gurgaon, India

- Worked on frontend development for **JARVIS**, Staqu's flagship AI-powered surveillance and analytics platform, and contributed to multiple AI-driven products including **TRINETRA**, **PAIS**, **SIMBA**, **Prahaar**, **JARVIS One**, and **PINE**.
- Built responsive and scalable UI components using React.js, Redux, and Antd Designs to visualize real-time video, audio, and intelligence-driven insights across projects.
- Collaborated with AI and backend teams to transform complex CCTV and crime analytics data into actionable dashboards for enterprises, governments, and smart city deployments.

Software Developer Engineer

Jul 2023 Oct 2024

Recht Tech Pvt. Ltd.

Gurgaon, India

- Worked on **5+** large-scale legal-tech products including **CRM Systems**, **Legal Information Portals**, **Assessment Platforms**, and the company website using the MERN stack.
- Improved UI/UX and optimized MongoDB queries, boosting user engagement by 20% and reducing API response time by 40%.

PROJECTS

Note: According to the nondisclosure agreement (NDA) in place, live URLs for Gulf Mirror Media Group LLC's portals cannot be shared publicly.

WonderMoM – Article / Magazine Platform

- Built a modern, responsive digital magazine platform using React.js with Vite, delivering rich editorial content focused on motherhood, wellness, and lifestyle.
- Implemented a scalable UI architecture with seamless content presentation and optimized performance for high readability across devices

Harvest Hub – E-commerce Platform & Admin Panel

- Developed a full-scale e-commerce website and admin dashboard using Next.js, Node.js, and Prisma ORM with SQL.
- Implemented product management, order workflows, and content control through a role-based admin panel.
- Delivered a seamless food-commerce experience emphasizing performance, scalability, and cultural authenticity.
